PHILIPS

sense and simplicity

Highlights

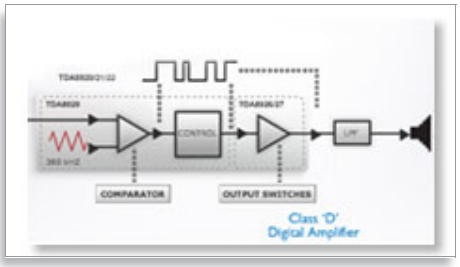
Free Internet radio stations

Streamium comes with thousands of free Internet radio stations. Now you can stay abreast of all kinds of music worldwide. Connect your Streamium to the Internet and listen to your favourite online programmes on your audio system without having to turn on your PC.

160 GB hard disk/2000 albums

The 160 GB hard disk provides a very large capacity for you to store your PC/MAC digital music files, easily holding up to 2000 music albums. Space saving, smart music collection management, easy access and all in one place.

2 x 50 W RMS Hi-Fi sound/Class D



Fill a room with your favourite music with the 2 x 50 W RMS music output power and Class "D" Digital Amplifier. The Amplifier takes an analogue signal, converts it into a digital signal and then amplifies it. The signal then enters a demodulation filter to produce the final result. The amplified digital output delivers all the advantages of digital audio, including improved sound quality. The Amplifier also has more than 90% efficiency compared to a traditional AB amplifier. This high efficiency translates into a powerful amplifier with a small footprint.

SoundSphere

Bask in the glory and energy of music as SoundSphere gives you each note as the artist intended. Delivering clear and natural audio, SoundSphere creates a sound impression that is deeper and wider. The result is life-like audio that will make you believe the artists are performing before you. Each SoundSphere speaker features a tweeter that hangs above the speaker box. The tweeter is able to emit sound more clearly and in all directions. Precise audio crossover engineering and careful positioning of the woofer to embrace the tweeter ensure minimised interference and even more natural sound.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.
